Customer:

Motorhome:

VIN:

Checks must be carried out in accordance with the latest AWS Motorhome Standard Working Procedures

## Guidance Notes

Readings between 0-15% - readings not recorded because no cause for concern

Readings between 15% - 20% - require further investigation. Compare with the average reading. Consider asking to recheck the area in three months.

Readings above 20% - will identify areas possibly needing remedial work. There may be signs of water ingress or evidence of moisture. Again, it may be worth considering a recheck after three months.

Readings above 30% - structural damage may be occurring and deterioration is inevitable.

## Please Note

We would emphasise that the above report accurately reflects the condition of your motorhome at the date stated. These readings may be subject to atmospheric conditions, and the company cannot accept any liability for water ingress, which may become apparent at a future date.
